ELEVENMONK • DATA ANALYSIS INTERNSHIP

Data Analysis

A Project-Based Internship Presentation

INTERNSHIP DURATION

03 August 2026 – 29 August 2026

STUDENT CREDENTIALS

Aryan Singh

Roll No. 2410031256 B.Tech (CSE)

HOST ORGANIZATION
ElevenMonk

Candidate & Internship Overview

CANDIDATE DETAILS

Student Name	Aryan Singh
Roll Number	2410031256
Degree	B.Tech (Computer Science & Engineering)
Academic Batch	2024–2028
University	IILM University

INTERNSHIP PROFILE

Organization	ElevenMonk
Role	Intern – Data Analysis
Duration	03 Aug 2026 – 29 Aug 2026
Work Mode	Project-Based
Location	Varanasi, India

Organization Profile

Information below is based on the internship completion certificate and company details.

ELEVENMONK

An IT solutions company based in Varanasi, India, offering website building, app development and further IT services.

WEBSITE DEVELOPMENT

Designs and builds websites for clients — a steady source of traffic, behaviour and performance data.

APP DEVELOPMENT

Builds mobile and web applications whose usage data can be analysed to improve products.

DATA-DRIVEN DECISIONS

A Data Analyst Intern turns project, user and lead data into clear insights and reports.

Problem Statement & Industry Context

THE DATA CHALLENGE

Business data from websites, apps and client projects often contains missing values, duplicates, outliers and hidden patterns.

The internship addresses this challenge through a sequence of practical data analysis tasks.

SOLUTION SCOPE

- Clean and prepare raw data.
- Explore patterns, trends and correlations.
- Visualize important information.
- Query data and track KPIs with SQL.
- Turn findings into business recommendations.

Core Project Objectives

01 Clean data: handle missing values, outliers and duplicates.

02 Use Python libraries such as Pandas, NumPy, Matplotlib and Seaborn.

03 Query and summarize structured data using SQL.

04 Identify patterns, trends and correlations through EDA.

05 Define KPIs and build dashboard-style reports.

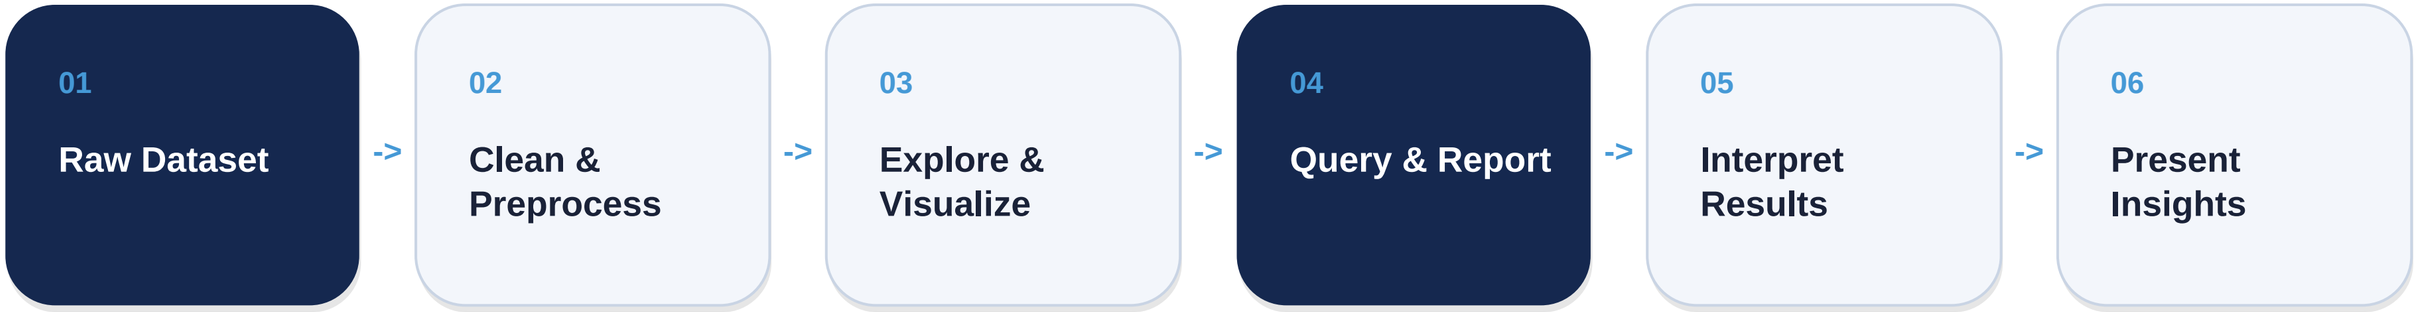

06 Present insights and recommendations in a structured report.

07 Apply the workflow to a website and app performance case study.

Technologies & Data Analysis Toolchain

Python	Core programming environment for the internship tasks.
Pandas	Data cleaning, processing and tabular analysis.
NumPy	Numerical computation and statistical calculations.
Matplotlib	Charts and analytical plots.
Seaborn	Statistical and exploratory visualizations.
SQL	Querying, joining and aggregating structured data.
Microsoft Excel	Quick checks, pivot tables and summary reports.
Jupyter Notebook	Interactive analysis and documentation.

Overall Data Analysis Workflow

The four internship projects collectively cover this progression from data preparation to applied business analysis.

Project 1 • Data Collection, Cleaning & Preparation

Due: 07 August 2026 • Completed Successfully

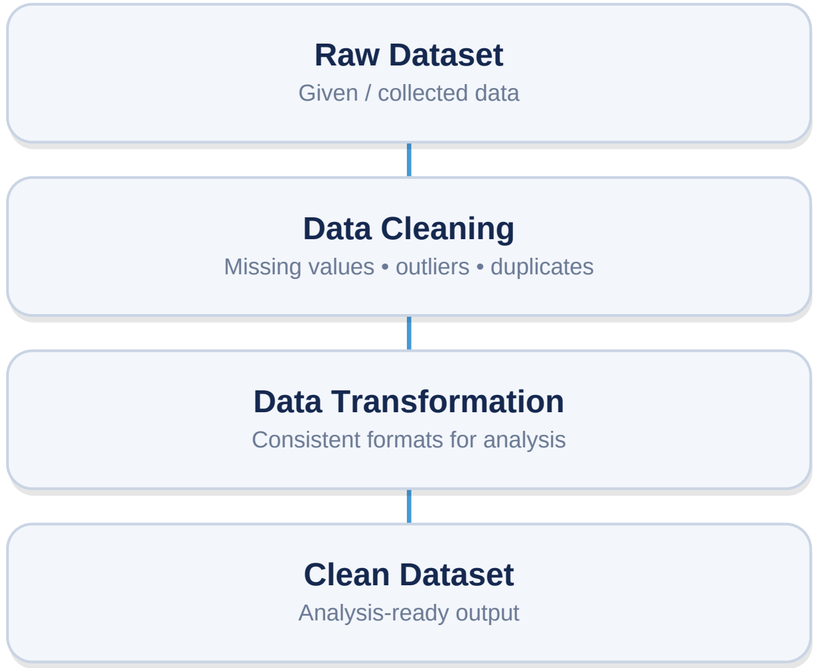

PROJECT FOCUS

Collect, clean and prepare raw business data for analysis.

Key activities

- Combine data from different sources.
- Handle missing values, outliers and duplicates.
- Standardize formats using Pandas and NumPy.

PROJECT WORKFLOW

Project 2 • Exploratory Data Analysis & Visualization

Due: 14 August 2026 • Completed Successfully

PROJECT WORKFLOW

Load Data
Import cleaned dataset

Data Exploration
Structure • types • summary

Univariate Analysis
Distributions and patterns

Bivariate Analysis
Relationships / correlations

Insights & Findings
Summarize key insights

ANALYZE • DISCOVER • COMMUNICATE

Explore the data to uncover patterns and trends.

Key activities

- Use statistical summaries and visualizations.
- Study distributions and relationships.
- Identify correlations and key influencing factors.
- Build charts with Matplotlib and Seaborn.

Project 3 • SQL Analysis & KPI Dashboard Reporting

Due: 21 August 2026 • Completed Successfully

QUERY • MEASURE • REPORT

Turn raw tables into decision-ready KPI reports.

Key activities

- Write SQL queries with SELECT, JOIN and GROUP BY.
- Aggregate data into summary metrics.
- Define KPIs such as traffic, leads and project status.
- Build dashboard-style visual reports.

PROJECT WORKFLOW

Project 4 • Business Analytics Case Study

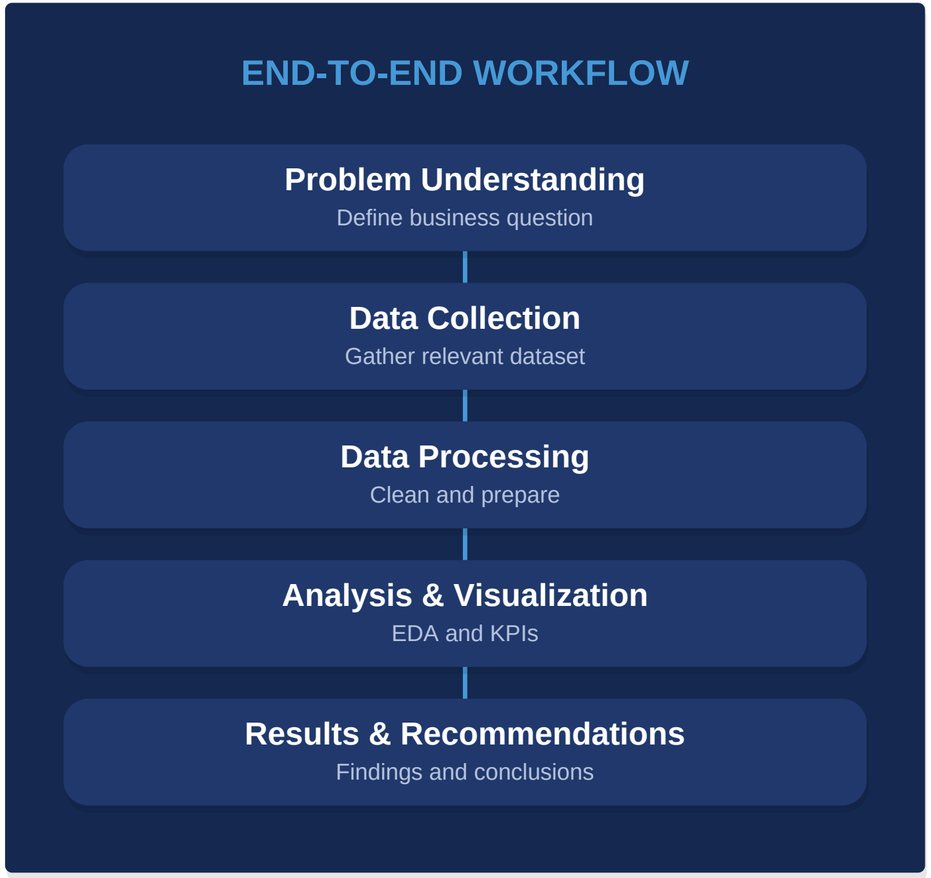

Due: 28 August 2026 • Completed Successfully

WEBSITE & APP PERFORMANCE

Analyse web and app performance data for an IT solutions business.

Key activities

- Define the business question.
- Perform end-to-end analysis and visualization.
- Present findings with recommendations.

Methodology & Assignment Timeline

Project 1	Data Collection, Cleaning & Preparation	07 Aug 2026
Project 2	Exploratory Data Analysis & Visualization	14 Aug 2026
Project 3	SQL Analysis & KPI Dashboard Reporting	21 Aug 2026
Project 4	Business Analytics Case Study	28 Aug 2026

All four projects were completed successfully during the internship (3 – 29 August 2026).

Expected Outcomes & Skills Developed

Data Preparation	Cleaner, more usable datasets through preprocessing.
Visualization	Ability to communicate information through charts and dashboards.
EDA	Stronger analytical thinking around patterns, trends and correlations.
SQL & Reporting	Querying data and tracking KPIs for decisions.
Business Insight	Linking data findings to practical recommendations.
Real-world Application	Ability to apply the analysis workflow to a business problem.

Certification & Credentials

INTERNSHIP CREDENTIALS

Internship Title
Data Analysis Internship

Issuing Organization
ElevenMonk

Certificate Date
29 August 2026

Internship Dates
3 Aug 2026 – 29 Aug 2026

Role
Data Analyst Intern

Signed By
Bina Singh, Founder

ELEVENMONK

CERTIFICATE OF INTERNSHIP COMPLETION

This is to certify that

Aryan Singh

has successfully completed an internship as **Data Analyst Intern** at ElevenMonk, from **3rd August 2026** to **29th August 2026**.

During this period, he demonstrated dedication, professionalism, and a strong willingness to learn, and contributed meaningfully to the team's work.

We wish him continued success in all future endeavors.

29th August 2026
